Team Name: sdmay24-17
Team Members:
- Alexandra Whitmer
- Karandeep Sandhu
- Zheyuan Zhang
- Grant DeWaay
- Seyedehbahareh Hashemimovahed
- Austin Krekula

Report Period: Nov 5 – Nov 19

Summary of Progress in this Period
- Created first prototype of the grid
- Completed iteration 1 of the display layout
- Discussed block design and how many we will use
- Finalized a design for the hardware grid
- Added artistic features to the design
- Completed the testing design document
- Completed the testing lighting talk
- Conducted more research on hardware components and began looking at potential parts to buy for final design

Pending Issues

- Design circuit to shunt sensors using 4 to 1 multiplexers
- Design required infrastructure models using 3D modeling software.

Plans for Upcoming Reporting Period

- Continue to do research on hardware parts and model design
- Work together to find solutions to our pending issues
- Meet with our client and advisor to work out issues
- Continue to work on prototype of the grid
